

# Oshikuku Mall

## Spacious and Contemporary

Construction to commence early 2015!

Oshikuku mall is envisaged as the first and unique retail experience that will form the key development in Oshikuku. The multi-mix mall will be situated in the town center of Oshikuku and will offer approximately 6060m<sup>2</sup> of retail leasable area, which will make the mall the largest to be constructed in the town.

The development will act as the central hub for a range of future mixed uses including:

- Retail,
- Tourist information center,
- Fuel Station,
- Offices,
- SME, and
- Professional services with ample parking.

The design inspiration for the mall is drawn from the natural and geological beauty of the northern regions of Namibia. This will be expressed in a contemporary way to the exterior and interior. The selected finishes and materials are intended to provide longevity and a timeless elegance to the design.
